

Industrial Environments

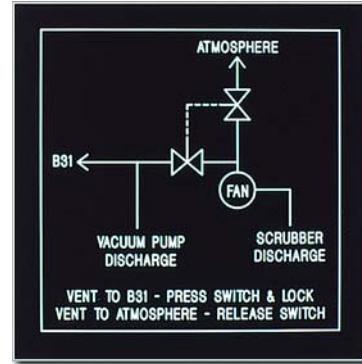

Tough industrial environments need signs durable enough to withstand harsh weather and abrasions, yet flexible for attachment to uneven surfaces. In conditions such as these, engraving has always been the preferred sign-making method, providing that look of permanence. So go ahead...hang your sign from a cable, nail it in place or even attach it with double-sided tape. Under even the harshest conditions, your engraved message will keep on working. Need to make your signs onsite? With the AutoGraver method, look at all you can do.

Choose recognizable pictograms from the Scott-TriPoint pictogram library as easily as selecting fonts.

Use our ready-to-engage blank hazard and safety signs in approved OSHA colors.

Scott-TriPoint® software imports complex diagrams and text from popular CAD programs.

Prepare custom profiles to fit any switch or lamp, then engrave fine lettering. Now that's a bright idea!

Health Facilities

Health care facilities have many different sign options, thanks to the versatility of our AutoGraver. Whether you're creating a detailed office directory or hospital directional signage, ADA signs, room names or numbers, our AutoGraver engraving system can assist you in maintaining that quality, professional appearance. A sample of health-related signs that you can easily make are shown here. We think you'll agree that, no matter the size or shape, these vital signs all check out just right.

Make your sign inviting—engrave an accent line around your text, then place your sign in a frame with an attractive, complementary color.

Combine colors and panels to form interesting directories, then change one name or more whenever the need arises.

When the opportunity knocks, use neutral-color frames to make signs of any color look at home on walls of any type.

Give each title the importance it deserves with classically elegant, clearly precise engraving.

Hotel Settings

Top to Bottom, Inside and Out®, Scott® materials and equipment allow your in-house maintenance staff to create signs from the front desk to the back nine. Whether friendly and inviting, or informative and direct, engraving provides that extra touch of elegance that forms a unique lasting impression. Keep your corporate identity consistent throughout, even in the design of your staff badges because that's one of the first things your guests will see. Now just look at all the ways to say "welcome."

Want your logo as a design accent? Just import it into Scott-TriPoint® software.

Combine Scott engraving material colors for signs that are simple to read, easy to remember.

Tactile letters, raised pictograms and Braille symbols meet ADA standards as well as your own for efficient signage.

Nothing is faster than engraving...make it in seconds, use it for as long as you like.

Special Effects

With just a touch of ingenuity, engraving can create special effects for extra, attention-grabbing impact. Imaginative techniques such as reverse engraving and subsurface graphics make a distinctive statement. You can also cut custom shapes, use colored Plexiglas for edge-lighted signs or heat and fold your material to make unique desk signs. Here are just a few examples of the unlimited possibilities available to you with engraving, the most universal sign-making method in existence. Now go ahead...display your brilliance for others to see!

Use a burnishing tool on a brass plate for awards and presentation plaques destined for a special place of honor.

You can even make your own holiday ornaments in the bright, cheerful colors of the season.

Special plastics can be engraved and edge-lighted to create glowing images. Engrave the back of engraving stock, then fill the engraved regions with paints from your local hobby shop.

For ADA signs, our handy carbide cutter creates raised Braille. The profiling tool cuts completely through engraving stock to form individual raised letters.
